

NOVEL (new case) RADIOLOGY CONSULTATION

The following protocol is for consultation on films on new patients, or patients Dr. Haburjak has already seen, but are presenting for new conditions.

- 1) Please email films to: TailWindVSC@gmail.com (we *vastly* prefer attached jpg or pdf images as opposed to links to pacs system databases)
- 2) Please indicate: Patient Name/Owner Last Name, Age, Breed, Body Weight & Sex.
- 3) Please indicate reason for submitting films: 6w history of left pelvic limb lameness, drawer palpated, grade III/IV MPL, fracture after falling downstairs yesterday
- 4) WHEN were the films taken? Eg 6m ago? Fractured 2w ago, films taken after initial injury
- 5) Please note any treatments attempted: eg rest and nsoids, PT, splintage
- 6) ALL FILMS MUST: have a clinical description of how the pet is doing and whether meds are still being administered.
- 7) N.B. with the number of films received daily for review, those received without a clinical history will not be responded to.
- 8) IF you do not receive a response within 48h – please text Dr. Haburjak, or call him. It is possible the films did not come through, or were viewed and the response did not go out.
- 9) For IMMEDIATE: feedback, we recommend sending these studies via email with this protocol AND texting Dr. Haburjak, he is frequently by a computer and able to consult on your patient (esp fracture)
