

## RECHECK RADIOLOGY CONSULTATION

The following protocol is for consultation on films taken of surgery Dr. Haburjak has performed surgery on.

- 1) Please email films to: [TailWindVSC@gmail.com](mailto:TailWindVSC@gmail.com) (we *vastly* prefer attached jpg or pdf images as opposed to links to pacs system databases)
- 2) Please indicated DATE of original surgery
- 3) Please indicate reason for submitting films: eg patient fell downstairs and is lame, or routine 6w follow-up
- 4) Please note any complications associated with the pet in the post-op period and/or any concerns you might have
- 5) ALL FILMS MUST: have a clinical description of how the pet is doing and whether meds are still being administered. Eg
  - a. Incision healed uneventfully,
  - b. Fully weight bearing when standing
  - c. Grade I-II/IV lame on walking, absent lameness at a trot ETC
- 6) N.B. with the number of films received daily for review, those received without a clinical history will not be responded to.
- 7) IF you do not receive a response within 48h – please text Dr. Haburjak, or call him. It is possible the films did not come through, or were viewed and the response did not go out.
